Test S-Drive on AppExchangeS-Drive turns the company network drive into a globally available, scalable and cost effective online platform.

Easily store and share documents, images, video and all other content using a simple windows explorer type of interface.

Send content to Salesforce.com and external contacts without the worry of file size limitations when sending email.

Store attachments for all of your standard and custom objects without the 5MB file size limit.

Lower your Salesforce.com storage fees by offloading attachments to S-Drive for cost effective and secure attachment storage

Use it as your RFP, contract, presentation, marketing brochure, product image repository and let all your users access and distribute content without any hassle. Stop struggling to send large files to your prospects, let them download the attachments directly from your secure site. For extra security, set expiration rules to define the amount of time files are accessible.

All storage is completely handled by Amazon Cloud storage system, which includes enterprise file storage, secure transmission and accessibility.

Retire your FTP servers and network shares. Upload your files to the S-Drive for anytime, anywhere access.S-Drive Documentation
