

Elvis DAM

Elvis Digital Asset Management system is developed by Dutch Software in Netherlands and sold by CyanGate.

Elvis has been designed based on ease of use and ease of management principles. Due to these features, return on investment on an Elvis based DAM system is higher compared to other DAM systems. Elvis supports variety of workflows for graphic designers, advertisement agencies, printers and marketing departments. Companies who leverage Elvis in their workflows increase speed to market, organize their valuable digital assets and minimize their costs.
